Ms. Brookshire has over 20 years of professional experience with emphasis in hazardous waste management and quality assurance and quality control. Specifically, Ms. Brookshire has extensive technical and management experience with a variety of projects that include in-depth site characterization and assessment, evaluation of remedial measures, long-term monitoring, and development of technical and regulatory strategy.

She has coordinated complex assessment projects under the Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and the Georgia Hazardous Site Response Act (HSRA) programs. Project experience includes petroleum sites, landfills, pesticide mixing facilities, automobile and airplane maintenance shops, chlorinated solvent releases, wood treating facilities, and chemical plants.

Ms. Brookshire has performed and supervised the collection of environmental field samples including soil, sediment, groundwater, surface water, and soil vapor. She has designed and implemented field QC programs for a variety of projects. In addition, she has performed field audits for compliance with project requirements.

Ms. Brookshire has designed and implemented analytical QA/QC programs for projects. She has developed data quality objectives, prepared Quality Assurance Project Plans and Sampling and Analysis Plans, coordinated with laboratories, and reviewed analytical data for method compliance and project usability. Ms. Brookshire worked in an environmental laboratory for several years analyzing soil and water samples using EPA methodology. She is experienced in gas chromatography, inductively coupled plasma spectrometry, atomic absorption spectrometry, titrametric and colorimetric techniques.

Ms. Brookshire has a BS in Chemistry from the University of Georgia. She is a Project Chemist and Certified Hazardous Materials Manager for PREMO. She has performed laboratory and consulting services out of the Atlanta, GA area since 1987.
