Ms. Harvey has over 19 years of experience in the environmental consulting business. She has extensive experience with operation and management (O&M) remediation projects at operating chemical plants, wood treating facilities, foundries and closed landfills. The O&M projects included UV oxidation, air sparge, groundwater pump and treat, separate phase pumping, MNA and groundwater and surface water monitoring. Ms. Harvey has worked successfully with industrial environmental managers, state and federal regulatory agencies and environmental attorneys.

As a professional engineer licensed in five states, Ms. Harvey has supervised the development and implementation of soil and groundwater assessment plans, remedial alternatives, monitoring plans and closure designs regulated under the US EPA Resource Conservation and Recovery Act (RCRA). In addition, Ms. Harvey has extensive experience with the development and negotiation of regulatory permits and statistical evaluation of soil and groundwater data for facilities in assessment, remediation and post-closure care. As an SMP manager, Ms. Harvey is responsible for staffing and managing multiple PREMO projects. Ms. Harvey has successfully decreased O&M costs at multiple facilities by reducing scope and regulatory requirements.

Ms. Harvey has a BS in Agricultural Engineering from the University of Georgia and post-graduate work in Environmental Engineering at Georgia Tech. She has worked in the Atlanta, Georgia area since 1988.
