Mr. Swearingen has over 10 years of industrial and environmental consulting and is responsible for managing various environmental investigation, remediation, and property redevelopment projects. His experience includes the management, collection and interpretation of air, soil, sediment, stormwater and groundwater field data. Mr. Swearingen has managed remediation systems and sampling projects in the oil and gas industry in Arkansas, Alabama, Tennessee, Mississippi, Texas and Louisiana. Mr. Swearingen has been the project manager on air, soil, and groundwater sampling and remediation projects related to chemical industries, wood treating facilities, gasoline refining facilities, bulk gas terminals, UST sites and power generating facilities. Mr. Swearingen has performed emergency response duties for both the state of Tennessee and a major gasoline retail company. In addition, he has been responsible for soil and liquid waste characterization and disposal at these facilities.

Mr. Swearingen has conducted USEPA air compliance testing at various industries including: petrochemical plants, paper mills, steel mills, hazardous waste incinerators, hospital incinerators, and munitions destruction facilities as well as other sources throughout the country. He has successfully managed large sampling teams and remediation systems to meet project goals, budgets and client needs.

Mr. Swearingen has a BA in Environmental Science from University of Memphis and is a Certified Hazardous Materials Manager (CHMM). He has worked in the Memphis, Tennessee area since 1997.
